

SINCE
1983

Uluslararası hikâyesi 1983 yılında demir doğrama ve alüminyum doğrama ile başladı. 1990 yılından itibaren sektörde alüminyum profil ve aksesuar satışı ile hizmete devam eden ULUSAN, 1998 yılında kurmuş olduğu elektrostatik toz boyası tesisi ile sanayileşme alanında ilk adımını attı. 24 yıllık satış ve pazarlama deneyimi ile 2007 de 1750 tonluk 7" SMS pres 2011 de 8" SMS 2750 ton pres ve 2015 de 7" SMS 2000 ton pres yatırımı ile beraber, OMAW-TURLA Extruzyon hattı yatırımı ve reçete kontrollü kanıtıma sisteme sahip ilk kompozit panel üretim hattı yatırımları tamamlandı. 2018 yılında Türkiye'de ilk piñç valf sistemi ile çalışan, stabil boyaya kalınlığı sağlayan dikey boyası tesisi tamamlandı. 2018 yılında son teknoloji dökme mineral dolgu yöntemi (hazır dolgu laminasyonu değildir) ile çalışan A2 (A2-s1,d0) yanmaz kompozit panel hattı yatırımlarını da gerçekleştirerek Anadolu'nun en büyük, Türkiye'de ve Avrupa'da faaliyet gösteren sayılı üreticilerinden biri haline geldi. 55000 m² si kapalı olmak üzere 85000 m² alanda kurulu entegre tesiste, üretim aşamalarının tamamına yakını tam otomatik makinelerle kontrol ediliyor. Önce insan prensibinden hareketle ana proses ve ara proseslerde çalışanların güvenliğini ve ürün kalitesini olumlu etkileyerek tüm kalite uygulamalarını ISO 9001 – OHSAS 18001 güvence sistemi ile denetim altına alan ULUSAN, alüminyum üretim tesisleri içinde en iyiler arasında yer almanın haklı gururunu yaşıyor.
